

## ABOUT US

We are the largest provider of dialysis services aboard cruise ships in the world, offering more cruises to more destinations from more locations. Since 1977, we have helped thousands of individuals on dialysis and their families experience the pleasures of cruising and the excitement of taking their dream vacation. Travel with us in confidence as all of your shipboard medical needs are handled by trained medical professionals.

### EXPERIENCED PERSONNEL

Each cruise is accompanied by a board certified/eligible nephrologist and two or more nurses, depending on the number of dialysis cruise patients on board. Our patient to staff ratio is 2 to 1. The medical staff is English speaking and recruited from the U.S. and Canada.

Twenty-four hours a day, patients can call our shipboard dialysis staff, and if necessary, they can reach our stateside medical support personnel around the clock.

### MEDICAL EQUIPMENT

We use the Fresenius 2008 K for your dialysis treatments. It provides maximum flexibility for your specific application with excellent performance and reliability. The simplicity and ease of use of the 2008K is unsurpassed.

### IMPROVED QUALITY OF LIFE

We offer our dialysis patients the freedom and opportunity to join their family and friends while exploring the world. This ability to travel is enhanced knowing their dialysis treatments will be provided onboard their ship by caring and dedicated medical professionals.

### NEW AND EXCITING UPGRADES

We have moved our facility locations on a variety of ships to the comfort of oceanview cabins, modified for your dialysis. Now you can sail to Alaska and witness the majestic glaciers or the relaxing Caribbean blue waters during treatments. Our modified staterooms not only offer beautiful views but also the comfort and space needed to provide excellent dialysis care.\*

\*Please note that the Norwegian and Margaritaville ship's infirmary is the designated area for the treatments and medical attention.
